

## AIMVT CASE LOG FORM

Name LAIM Equine Candidate

Case Log #	Date	Patient ID +/-or #		
1	00/00/0000	XXXXX		
Species	Breed	Sex	Age	Weight in Kg.
Equine	Clydesdale	Female	6 years	845 kg

Diagnosis: Retained placenta

Advanced Skills & Procedures I performed: Oxytocin infusion preparation and administration (23) and complete physical exam (7).

Advanced Skills & Procedures I assisted: Ultrasonography (12)

**Outcome: Discharged**

Case Log #	Date	Patient ID +/-or #		
2	00/00/0000	XXXXXX		
Species	Breed	Sex	Age	Weight in Kg.
Equine	Clydesdale	Female	8 years	783 kg

Diagnosis: Fever and colic of unknow origin

Advanced Skills & Procedures I performed: Complete physical examination (7)

Advanced Skills & Procedures I assisted: ultrasonography (12)

Outcome: Discharged

Case Log #	Date	Patient ID +/-or #		
3	00/00/0000	XXXXX		
Species	Breed	Sex	Age	Weight in Kg.
Equine	Fresian	Female	10 years	614

Diagnosis: Suspect Equine protozoal myeloencephalitis (based on a positive Western Blot and physical exam.

Advanced Skills & Procedures I performed: DMSO preparation and administration (23), and physical exam(7).

Advanced Skills & Procedures I assisted: neurologic exam (40)

Outcome: Discharged

Case Log #	Date	Patient ID +/-or #		
4	00/00/0000	XXXXXX		
Species	Breed	Sex	Age	Weight in Kg.
Equine	Quarterhorse	Female	6 years	450 kg

Diagnosis: Equine Herpes Virus

Advanced Skills & Procedures I performed: Prepared and administered DMSO and Thiamine infusions (23), performed complete physical examination (7), management of patient in a sling (36), collected and handled CSF for analysis and cytology (50,3)

Advanced Skills & Procedures I assisted: Removal of down, anesthetized horse from trailer (40), atlanto-occipital spinal tap (50), placement of horse in sling (36), and urinary catheterization (53).

Outcome: Discharged

Case Log #	Date	Patient ID +/-or #		
5	00/00/0000	XXXXX		
Species	Breed	Sex	Age	Weight in Kg.
Equine	Quarterhorse	Male	5 years	448 kg

Diagnosis: Pleural pneumonia

Advanced Skills & Procedures I performed: Set-up and administration of oxygen via nasal cannula (35), maintenance of indwelling chest tube drains (41), proper collection and handling of fluid samples for cytological evaluation (3), arterial blood gas collection and analysis (4), complete physical examination (7).

Advanced Skills & Procedures I assisted: thoracic ultrasound (12), thoracic trocarization (41) and abdominocentesis (51)

Outcome: Discharged

Case Log #	Date	Patient ID +/-or #		
6	00/00/0000	XXXXX		
Species	Breed	Sex	Age	Weight in Kg.
Equine	Belgian	Female	3 days	60 kg

Diagnosis: Sepsis, neonatal maladjustment syndrome

Advanced Skills & Procedures I performed: Clean and bandage extremity wounds (31), apply fluorescein stain to eyes (8), plasma transfusion (52), calculated and prepared CRI (23), neonatal nutrition via nasogastric intubation (21), implement reverse isolation

protocol (30), neonatal restraint (44) and complete physical examination of the neonate (8).

Advanced Skills & Procedures I assisted: nasogastric feeding tube placement (57b), arterial blood gas (4).

Outcome: Euthanized
